Development Experience:

General Assembly (Mar '18 - Jun '18)

Completed 500 hours of training in full stack web development languages and technologies showcased in three projects. Knowledge of frontend web languages learned includes HTML/CSS, JavaScript, jQuery, Ruby, Express, and Ember. Backend technologies learned include Ruby/Rails, MongoDB, Heroku, Atom, Sublime, OSX and GitHub.

Completed Projects:

1. Chris Sale Fan Page (Capstone) - JavaScript, Ruby on Rails, Heroku

I built this full stack application as a tribute to the Boston Red Sox pitcher using an Ajax frontend and a Ruby/Rails backend. Users can enjoy a slideshow and have full CRUD access to a database resource.

2. Bucket List - JavaScript, Express, MongoDB

As part of a team, I helped build this application using an Express frontend and a MongoDB backend framework.

3. Baseball Database - JavaScript, Ruby on Rails, Heroku

This single resource full stack application allows users access to full CRUD on a single resource. Built with a classic frontend and a Ruby/Rails backend and a Heroku database.

Other Experience:

IT Manager (Jan '18 - Jun '18)

Sentry Analytics LLC

Built and managed website with Wix.com tools and responsible for all tasks in graphic design, CRM management, and technical troubleshooting.

Compliance and Customer Support (Feb '16 - Jan '17)

Blue and White Holdings (Israel)

Provided technical support and troubleshooting for customers using financial trading platforms.

Increased efficiency of customer support team using enhanced analytics.

Organized compliance documents to expedite new client verification.

Marketing Analyst (Dec '14 - Sept '15)

DCTL Solutions Ltd (Israel)

Designed and created live/recorded educational webinars on financial education and asset evaluation.

Lead analytics team and advised Marketing Dept. on email campaigns.
